			Zambia												
			Zimbabwe												

**Notes:**

“x” under Aid Dependency denotes missing data; model scores are estimated.

“o” under State Formation Instability denotes states that gained independence prior to the post-World War II “decolonization” phase.

**Continuous variables:** Red icons indicate bottom quintile; yellow icons indicate second from bottom quintile; green icons indicate top quintile.

**Dichotomous variables:** Red icons indicate that dynamic quality exists; yellow icons indicate that structural/exogenous quality exists.
